Making e payment

In Singapore, we have a wide range of e-payment services operated by various providers:

- Apple,
- EZ-Link,
- DBS Bank,
- Grab,
- NETS,
- Samsung etc.

在新加坡，我们有各种提供商提供的各种电子支付服务：

- 苹果，
- EZ-Link，
- 星展银行
- Grab，
- NETS，
- 三星,等 等

30 years ago, Singapore pioneered one of the world's first nationwide e-payment services in 1986 when NETS (Network for Electronic Transfer Singapore) launched NETS Debit enabling bank ATM cardholders to pay electronically for their bills and retail purchases.

NETS: 新加坡电子转帐网络

Last few years, we have experienced a steady stream of mobile payment apps from major financial institutions

- DBS PayLah!
- OCBC Pay Anyone
- Apple Pay
- Samsung Pay
- SingTel Dash
- GrabPay

在过去的几年中，我们经历了来自主要金融机构的稳定的移动支付应用程序源

- DBS PayLah！
- 华侨银行向任何人付款
- 苹果支付
- 三星支付
- Singtel Dash
- GrabPay

Many payment apps started as mobile e-wallets for credit and debit cards but have rapidly moved into P2P fund transfers.

Grab introduced P2P functionality on its in-app mobile wallet GrabPay in 2017 and has been especially active in promoting its use amongst small businesses such as hawkers.

许多支付应用程序起初是用于信用卡和借记卡的移动 钱包 (eWallet)，但已迅速转移到P2P资金转移中。

Grab于2017年在其应用程序内移动钱包GrabPay中引入了P2P功能，并特别积极地在小贩等小企业中推广其使用。

A significant milestone is the launch of the PayNow fund transfer service in July 2017. Supported by the Association of Banks of Singapore, PayNow allows for instantaneous fund transfers just by using the recipient's mobile number or identity card number. With PayNow, users no longer need to remember or share bank account details in order to send or receive funds thereby removing a major user bugbear hindering electronic fund transfers.

一个重要的里程碑是2017年7月推出了PayNow资金转帐服务。在新加坡银行协会的支持下，PayNow只需使用收件人的手机号码或身份证号即可进行即时资金转帐。 使用PayNow，用户不再需要记住或共享银行帐户详细信息即可发送或接收资金，从而消除了阻碍电子资金转账的主要用户错误。

You **can** link one Proxy (such as **your mobile number**) to one **bank** account and a **different** Proxy (such as **your** NRIC/FIN) to another **bank** account. **The** two accounts **can** be from **2 different** participating **banks**.

您可以将一个代理（例如您的手机号码）链接到一个银行账户，将另一个代理（例如您的NRIC / FIN）链接到另一个银行账户。 这两个帐户可以来自2个不同的参与银行。

Some Live Example

Phishing is the fraudulent attempt to obtain sensitive information or data, such as usernames, passwords and credit card details, by disguising oneself as a trustworthy entity in an electronic communication.

网络钓鱼是通过伪装成电子通信中的可信赖实体来获取敏感信息或数据（例如用户名，密码和信用卡详细信息）的欺诈性尝试。
