

U Tube Video Production

By

Ernest Lim

U-Tube Account

Establishing your own [YouTube](#) channel takes just a short while. You may want to customize the channel by adjusting a handful of options, uploading your photo or logo, and linking your channel with your other online social networking accounts, like Facebook and Instagram.

Creating A U-Tube Channel

- 1) create your free Google account.
- 2) If you're starting a YouTube channel for your business, set up a separate Google/YouTube account
- 3) use an unique email address. In this way someone from within your organization can run the channel without you having to give out your personal Google account username and password.
- 4) only one YouTube channel can be associated with each Google account.

To create a Google account, follow these steps:

1. Launch any web browser on your computer that's connected to the internet and visit www.youtube.com.

The image shows a screenshot of the YouTube homepage. At the top, there is a search bar with the text "Search" and a magnifying glass icon. To the right of the search bar are icons for home, grid, and a "SIGN IN" button. Below the search bar is a navigation menu with "Home", "Trending", and "History". The main content area is titled "Recommended" and displays a grid of video thumbnails. The first row includes: a bulldog in water (10:02), a woman in a purple dress (5:32), a OneKey activation screen (3:12), and a woman in a bikini (10:21). The second row includes: a cat and a snake (6:53), a keyboard (8:18), a Skype tutorial (14:52), and a Skype account creation screen (10:25). A "SHOW MORE" link is visible at the bottom of the recommended videos section.

2. From the YouTube homepage, click on the "Sign In" link that's displayed near the top-right corner of the screen.

Create your Google Account

One account is all you need

One free account gets you into everything Google.

The Google username you select will also become your YouTube channel name, and a free Gmail address will be issued to the account. Use your business name as your username or choose something that's clever and that your intended audience will identify with. The channel name/username should be easy to spell and something that people will remember. If your YouTube channel will be promoting a product, for example, consider using the name of the product (assuming it is not copyrighted or trademarked by someone other than you or your business) as your username.
